Journal of Fluid Mechanics **Volume 323 25 September 1996**

D. R. Webster, D. B. DeGraaff & J. K. Eaton Turbulence characteristics of a boundary layer over a swept bump *page* 1

P. S. Karasso & M. G. Mungal Scalar mixing and reaction in plane liquid shear layers 23

R. S. Johnson A two-dimensional Boussinesq equation for water waves and some of its solutions 65

Z. Rusak Axisymmetric swirling flow around a vortex breakdown point 79

D. P. Wall & S. K. Wilson The linear stability of channel flow of fluid with temperature-dependent viscosity 107

X. Wu, P. A. Stewart & S. J. Cowley On the weakly nonlinear development of Tollmien–Schlichting wavetrains in boundary layers 133

R. A. Antonia, Y. Zhu & H. S. Shafi Lateral vorticity measurements in a turbulent wake 173

M. Siegel, S. Tanveer & W.-S. Dai Singular effects of surface tension in evolving Hele-Shaw flows 201

D. G. Lynch, S. L. Waters & T. J. Pedley Flow in a tube with non-uniform, time-dependent curvature: governing equations and simple examples 237

J. R. Lister & P. J. Dellar Solidification of pressure-driven flow in a finite rigid channel with application to volcanic eruptions 267

K. C. Hall & S. R. Hall Minimum induced power requirements for flapping flight 285

J. Vanneste Rossby wave interaction in a shear flow with critical levels 317

R. Fernandez-Feria Viscous and inviscid instabilities of non-parallel self-similar axisymmetric vortex cores 339

A. V. Bunyakin, S. I. Chernyshenko & G. Yu. Stepanov Inviscid Batchelor-model flow past an airfoil with a vortex trapped in a cavity 367

M. A. Gilbertson & J. G. Yates The motion of particles near a bubble in a gas-fluidized bed 377

P. A. J. Mees, K. Nandakumar & J. H. Masliyah Secondary instability of flow in a curved duct of square cross-section 387

REVIEWS

Mechanics of Mixtures, by K. R. Rajagopal & L. Tao 410

The Centenary of a Paper on Slow Viscous Flow by the Physicist H. A. Lorentz, edited by H. K. Kuiken 411
